Swap Meet and FUN FLY! July 11

Coming in hot this weekend is the Valley Flyers Swap Meet and Fun Fly July 11th!

All hands on deck! Bring something to sell, bring something to fly, bring yourself and enjoy a good time at the Apollo XI field

Please show your support for this wonderful event. Flyer for this even is on the next page.

So far planned attendees are Sam Wright, Tim Johnson, Tim Cardin, Frank M, Shaun Roblee. If you want to join in on the fun contact one of the known attendees, some of us are carpooling to the event. Otherwise contact Chuck Thomson. His email is on the flyer on page 2. SEE YOU THERE!!

Commanders Note From The Bench

“Scale Squadron of Southern California hosted 55 paid pilots”

June was a blur and the topping on the cake of scale flying was our outstanding Warbirds and Classics event. The Scale Squadron of Southern California hosted 55 paid pilots for our first real scale event at our new location. The entire program was a success from pre-registration the cool T-Shirts, hot breakfast and lunch and the fabulous BBQ at the Lake Front overlooking Irvine Lake.

Our guest pilots from Arizona and Las Vegas were the first to try out the new RV camping area and the reports were positive. They had a great view of the field from their elevated parking area.

None of this would have been possible without the support of the OCMA Board and their help in setting up the field and tearing down. I am happy about the close

"focus is on the rubber powered aircraft in preparation for our August Rubber Powered event"

relationship and partnerships with OCMA and the Scale Squadron.

Mike Greenshields did another fantastic job in planning, gathering up raffle prizes and organizing the food and kitchen help. There were many other details on Mike's plate but he pulled it off without a lot of drama. I think Mike has the hang of it now, and his professional management was a big part of the event's success. The club did make a profit and we should have the final numbers at the meeting Monday night.

Our logo for the event was provided by our good friend Scott Carter and we received a lot of good compliments on Scott's creative art. Everyone in the club had hands on deck for the event and even squeezed in some flying. I will miss a name or two in the thank-yous, but to

all of you who were there lending a hand with parking, signs, cooking, registration, flightline and even announcing, did an outstanding job. It certainly was obvious that this event wasn't our first rodeo and that attributes to the smoothness of the entire weekend. That is not to say we didn't have some items pop up that we will correct for next year, but in comparison they were small items to improve the event. We were also fortunate to have Col. Robert E. Thacker join us for the Saturday Night BBQ with his usual humorous chat sessions while he signed T-Shirts and pilot numbers. A rare treat indeed for those of us involved with warbirds and their associated history.

Brian Young won the new VQ Models F82 Betty Jo ARF patterned after the Colonel's F82 which now resides in the Wright Patterson Air Force museum.

Sam Wright showing of his progress on his Rubber Power model

In review as Commander, I applaud all of you for any way that you participated at the event was duly noted and greatly appreciated. My final words on the Warbirds & Classics are "watch out for next year....."

If you receive this newsletter before this Saturday July 11, we are heading up to Apollo Field for their Annual Fun Fly and Swap Meet. Several of their members made our event and many of us are heading to Apollo Field Saturday. The program for this month's meeting is an easy one and all the focus is on the rubber powered aircraft in preparation for our August Rubber Powered event in the Hobby People's warehouse in Fountain Valley. I encourage you to bring your rubber powered

projects to the meeting in the box, partially assembled or ready for covering. We will do our best to get you ready for the event next month. This is also a good time to bring your completed rubber powered models as well.

This will basically be a workshop with various techniques to cover your model, correct rubber wind and length as well trimming the model. I am sure there will be additional models for you to purchase as well. I look forward to your anticipation and attendance this coming Monday at 7:00PM, July 13.

Until then, build something scale,
Sam
